

Public Safety Projects

Priorities for Lincoln

Two high-priority projects

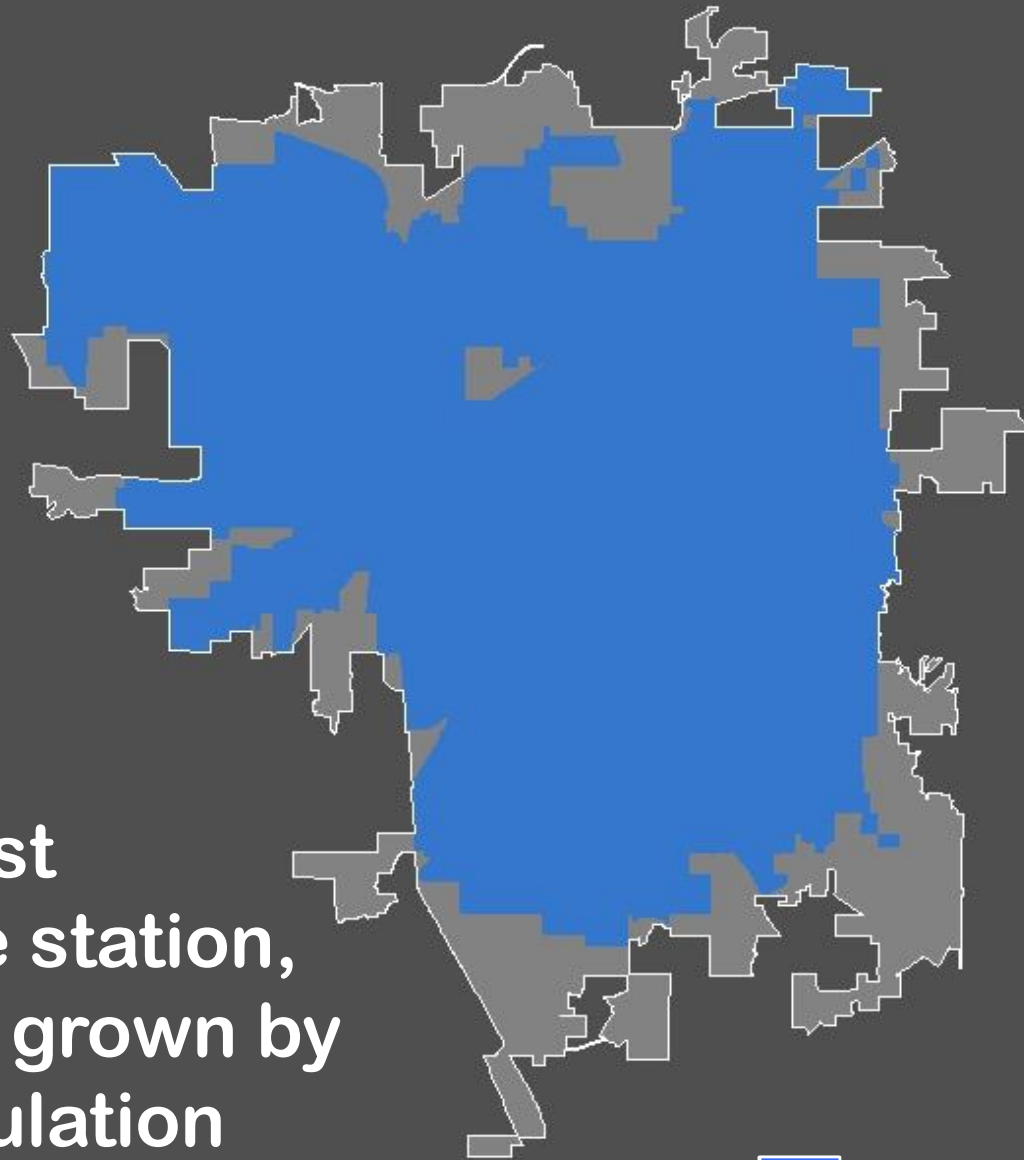

- Replace our aging 911 radio system
- Optimize the location of four fire stations to serve a growing community
- Proposed financing: $\frac{1}{4}$ cent sales tax for three years

- Lincoln's 911 radio system dates to 1987
- It is critical to public safety
- It has served us well
- The technology is now obsolete
- Vendor support is ending

Like other 1980's technology
it's time to move on

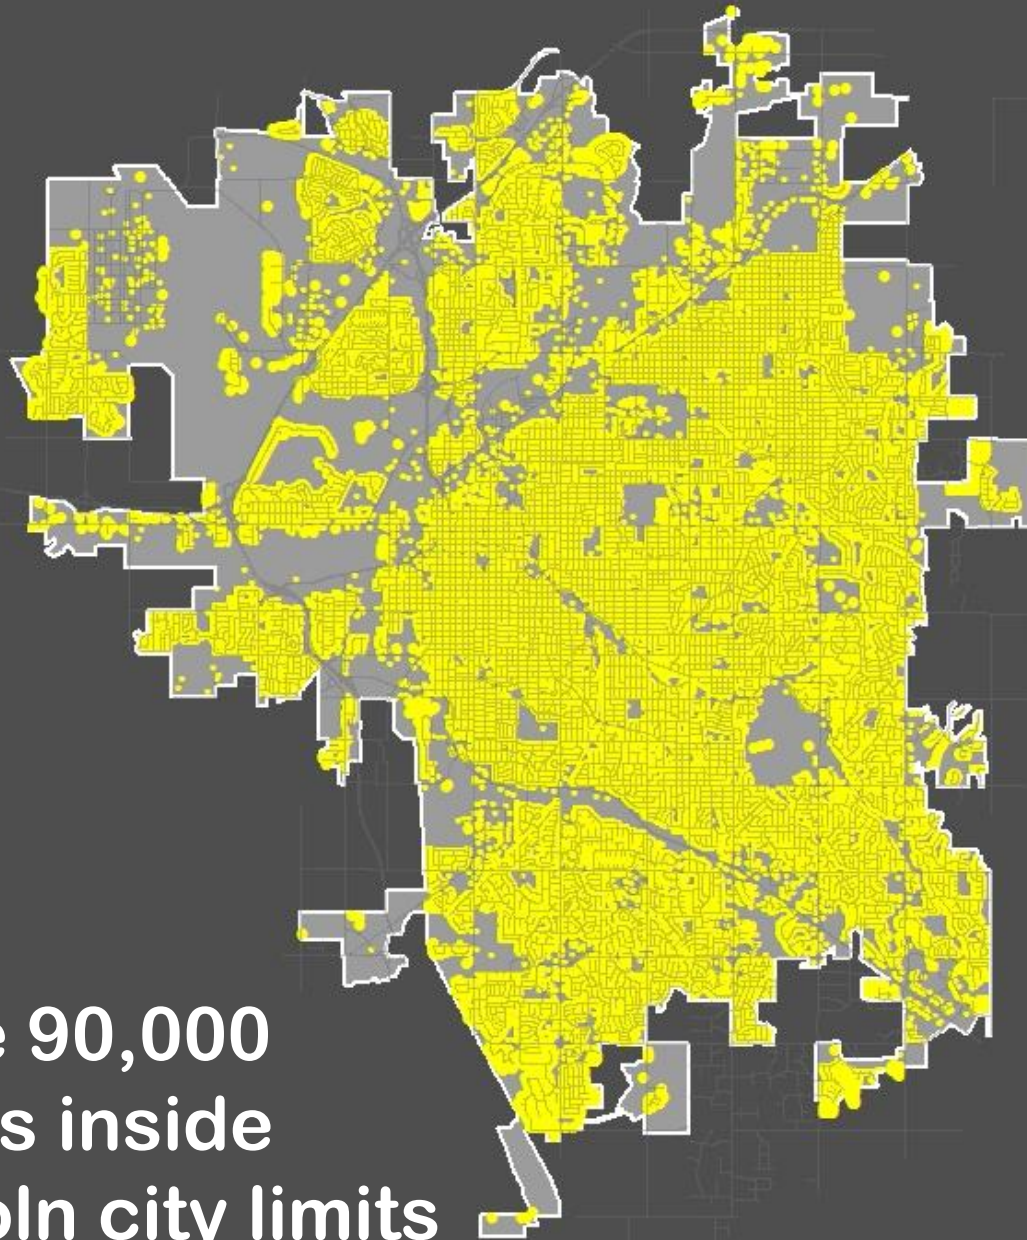

Since we last
added a fire station,
Lincoln has grown by
57,000 population
and 22 square miles

City limits 1997

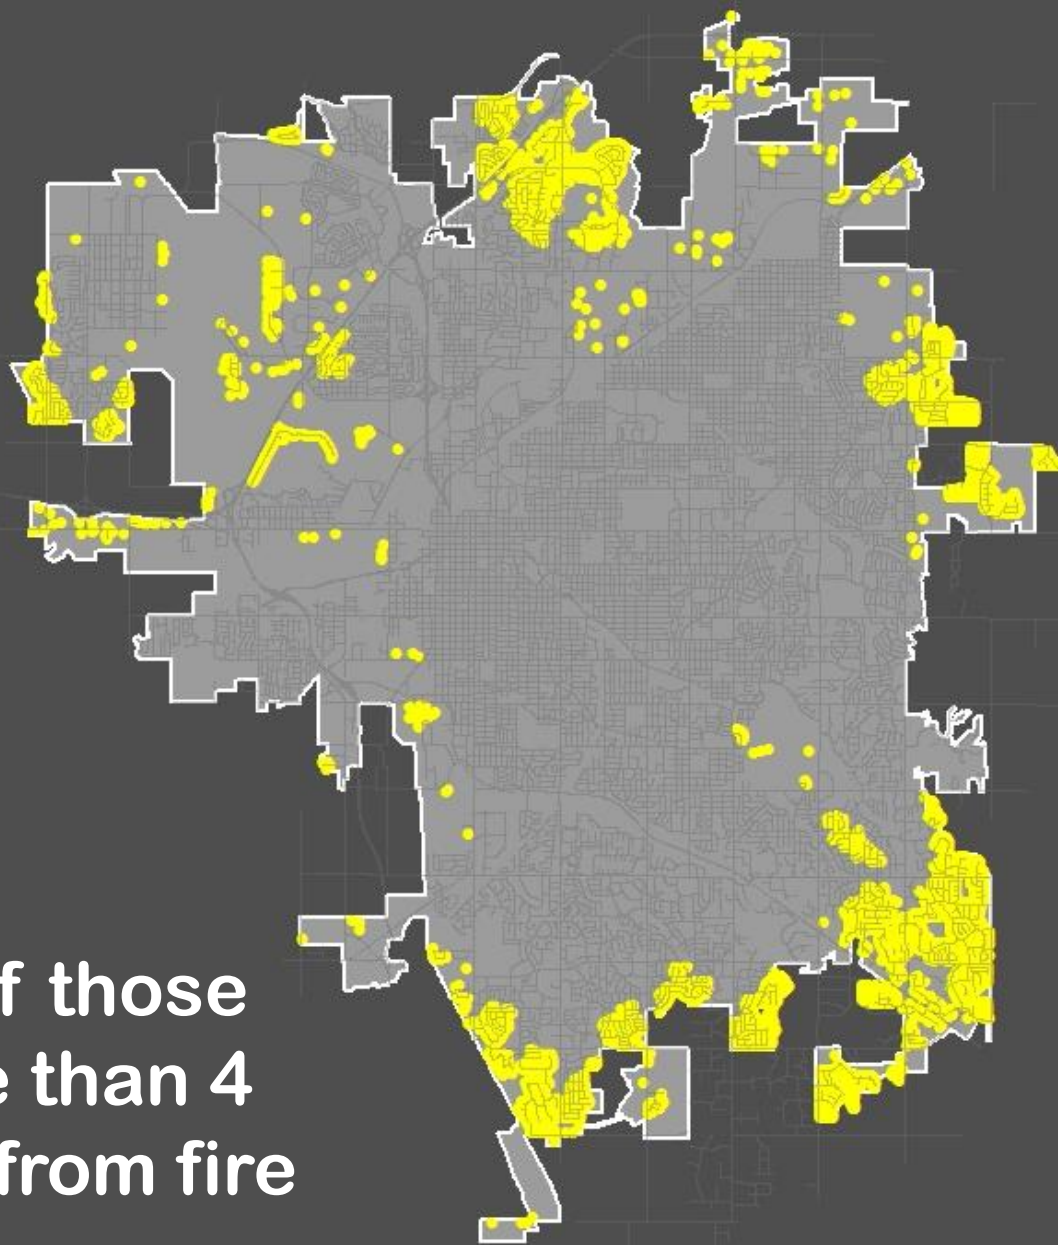

City limits 2015

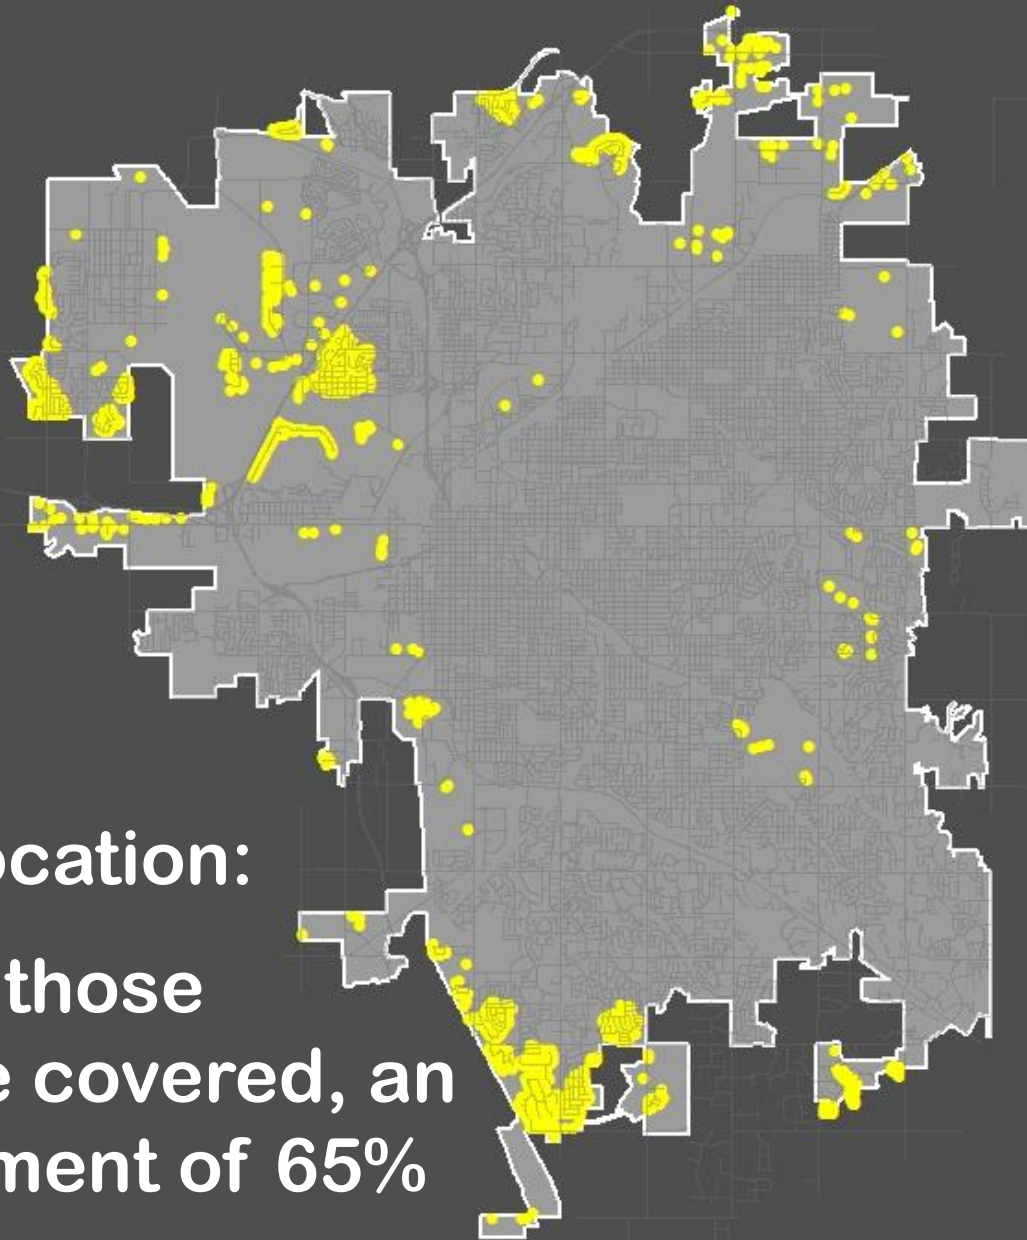

There are 90,000
addresses inside
The Lincoln city limits

Today:
10,000 of those
are more than 4
minutes from fire
station

**With relocation:
6,500 of those
would be covered, an
improvement of 65%**

One of the four stations will be police and fire, eliminating excessive travel time for police to Southeast Lincoln

What these projects do:

- Ensure a reliable and rapid response to emergency 911 calls
- Protect our police officers and firefighters
- Provide the best value for taxpayers, through pay-as-you-go financing
